User Evaluation Form

IHSDM 2007 Public Release

FHWA invites you to provide feedback on the IHSDM 2007 Public Release by completing and e-mailing this form to IHSDM.Support@fhwa.dot.gov. Users may also provide feedback by submitting a Problem Report/Change Request through www.ihsdm.org, by calling the IHSDM Help Line at (202) 493-3407, or by e-mailing IHSDM.Support@fhwa.dot.gov.

1. Please let us know who you are:

   Name:
   Title:
   Organization:
   Email address:

2. The 2007 Release includes significant changes to the IHSDM Highway and Intersection Editors, which were restructured to improve workflow and ease of entering/viewing data (e.g., the Highway Editor now includes six “Views” of data; some data elements were moved from the Evaluation Process to the Highway Editor). Are these changes helpful? Do you have any suggestions to improve the Highway/Intersection Editors or data handling in general?

3. Have you tried to import highway data exported from the IHSDM 2006 Release or “legacy” data originally created in the IHSDM 2004 Public Release? If so, were the instructions clear and did you encounter any problems?

4. The Evaluation Process/Wizard was enhanced, including improvements to the data checking process that now provides direct data editing capabilities similar to the Highway Editor. Do you find these changes useful, and do you have any suggestions to improve the Evaluation Process?
5. The 2007 Release includes enhancements to the IHSDM graphical user interface. Does the Navigation Tree/Button Panel/Desktop interface provide a good environment for managing your IHSDM data and accessing evaluation results? Do you have any suggestions to improve the user interface?

6. A Workflow Wizard and an Evaluation Wizard are available to guide users through the software. How helpful do you find the Wizards? Do you have any suggestions to improve them?

7. Is the concept of Highway/Intersection “Versions” clear? Do you find versions helpful? Why or why not?

8. The documentation contents have been updated and reorganized. How helpful is the Help Browser in navigating the documentation (e.g., can you easily find the help you need?) Do you have any suggestions to improve the documentation?

9. The Administration Tool interface was totally reorganized. Do you find the new interface easier to use? Do you have any suggestions to improve the Administration Tool?

10. Please provide any additional comments you have on the IHSDM 2007 Public Release:
